Work Experience

INNOCEAN USA | AEM Automation QA Engineer and Author (Temporary Contract)

July 2020-December 2020

Work as a QA engineer and AEM author to update automotive manufacturer Genesis's (Hyundai subsidiary) website to feature 2021 vehicles. Employed at global advertising agency INNOCEAN, which manages the Hyundai account.

- Performed QA tests on API routes using SOAPUI along with testing for asset path accuracy, mobile responsiveness, and browser compatibility. Responsible for determining site structure, following workflows, uploading dynamic media, multi-site manager and maintaining OSGI standards.
- Responsible for AEM content authoring, including selecting templates, components and modules and adding/editing content (copy, images, video, tagging, SEO metadata, pixel tracking), to compose web pages based on brand guidelines.
- Contributed to cross-functional technology and digital media teams to ensure website operations; coordination across agency on go-live scheduling; processed tickets in a deadline-driven environment. Production tracking on Jira.

SaRA | Full-Stack Software Intern sara-health.com

3/2018 - 8/2018

Helped build a Python-Flask application for physical therapists to improve their communication with patients and increase patient compliance during physical therapy, leading to shorter recovery times and reduced costs.

Above the Noise Communications | Web Developer ATNPR.com

3/2018-5/2018

Worked as a web developer to set up agency website using Django and edited website copy.

Personal Projects
